Soli Deo Gloria

PROFILE

I began designing and developing software applications in 2010. I take pride in a detail-oriented approach to development that focuses on user experience. My goal as a leader is ultimately to create more leaders. I encourage investment by giving my teams ownership of their work.

TECHNICAL SKILLS

I have strong experience in the following technologies:

.NET (C#, ASP.NET, Blazor)	Node (React, Angular, TS)	iOS & Android (Swift, Kotlin)
Docker, K8s, Helm	Core Web (HTML, CSS, JS)	Cloud (Azure, Firebase, AWS)
SQL/NoSQL databases	CI & CD Pipelines, ADO	Python, PHP, Scripts (PS, *sh)
UI/UX (Figma, Illustrator, etc.)	AI, agentic development	Asynchronous tools (Git, etc.)

EXPERIENCE

Software Engineer — Phase 2, 2023–Present

Architect, develop, and deploy full-stack software for iOS, Android, and Web (.NET/Angular). Develop and maintain CI pipelines on multiple platforms. Consult with and advise product owners and stakeholders of large clients.

Software Development Team Lead — Paycom, 2019–2023

Led full-stack team designing and implementing single-page apps (React), load-balanced web APIs (.NET/Kubernetes), relational databases, and CI pipelines.

Software Engineer — Darlington Public School, 2010–2020

Developed software as needed for school faculty. Designed and managed hardware and network topology and infrastructure. Provided consultation and training as needed.

Marketing and Communications Manager — SWOSU, 2018–2019

Created websites, databases, graphics, video productions, applications, and other media for the Residence Life department.

Software Development Intern — NASA, 2016-2017

Developed software for Space Launch System (SLS) simulations. Created interfaces for parsing analog and binary data from hardware buses. Served as Technical Lead for university validation research.

EDUCATION — SOUTHWESTERN OKLAHOMA STATE UNIVERSITY

Master of Business Administration — 2019

Bachelor of Science, Computer Science — 2017
